PROFILE

BSIT first year student at PHINMA Araullo University - South with hands-on experience in remote technical support using AnyDesk. Possesses foundational knowledge in software programming, web development, and system troubleshooting. Fully equipped with a personal laptop and stable internet connection configured for an efficient Work-From-Home (WFH) environment.

PROJECTS & TECHNICAL EXPERIENCE

Technical Lead • SmartEL Technical Team

2025 – 2026

- Maintained university digital systems and systematically organized system data records.
- Provided reliable remote technical support to faculty and students utilizing AnyDesk software.
- Conducted structured orientation and training sessions for teachers on system navigation and usage.
- Assisted in software installation, setup configuration, and basic remote network troubleshooting.

Offline Attendance System • Sta. Cruz National High School

2026

- Engineered an offline attendance tracking application designed to record student check-ins locally.
- Integrated automated data sorting mechanisms and structured record-keeping for daily log analysis.

CERTIFICATIONS & AWARDS

- **Computer System Servicing NCII** (2026)
- **ICT Technical Support Certification** (SCNHS)
- **3rd Place** – Poster Making Contest (2024)
- **1st Place** – Poster Making Contest (2018)

TECHNICAL SKILLS

Programming: JavaScript, Python, Java, C++, HTML/CSS

Tools & Platforms: Git/GitHub, AnyDesk, Remote Desktop

Soft Skills: Problem Solving, Collaboration, Communication

EQUIPMENT FOR REMOTE WORK

- Dedicated personal laptop with stable high-speed internet connection.
- Proficient with remote desktop tools: AnyDesk, Google Meet, Zoom.

Hiring Manager

Old St. Labs Internship Program

Remote Work - Philippines

APPLICATION FOR INFORMATION TECHNOLOGY INTERNSHIP PROGRAM

Dear Hiring Manager,

I am writing to express my strong interest in the Internship Program at Old St. Labs, which offers a 15,000 pesos monthly allowance in a work-from-home setup. I identified your posting on Indeed for a paid 2-month program and am eager to participate in direct training from your team of technical experts while contributing remotely.

I am currently a first-year Bachelor of Science in Information Technology (BSIT) student at PHINMA Araullo University - South. Between 2025 and 2026, I served as Technical Lead for the SmartEL Technical Team. In this role, I maintained university digital systems and delivered remote technical assistance to faculty members using AnyDesk for system configurations and software troubleshooting. This practical experience sharpened my ability to guide non-technical users remotely and resolve fundamental software and network issues efficiently.

In addition to technical support, I engineered an offline attendance tracking application for Sta. Cruz National High School that records student check-ins reliably without continuous internet connectivity. My technical foundation includes basic proficiency in Python, JavaScript, HTML/CSS, and Git/GitHub, complemented by a National Certificate II (NCII) in Computer System Servicing. I operate with a fully equipped personal laptop and a stable high-speed internet connection optimized for remote work.

Thank you for taking the time to consider my application. I welcome the opportunity to discuss how my technical support background and enthusiasm for software development align with the goals of Old St. Labs. My resume and GitHub portfolio links are attached for your review.

Sincerely,

Paul J. Reyes

BSIT Student & Technical Support Specialist

JOB / EMPLOYER REFERENCE

Target Position & Opportunity Verification

REFERENCE SPECIFICATIONS

JOB TITLE

Internship Program (IT Intern)

COMPANY NAME

Old St. Labs

LOCATION / SETUP

Work From Home / Remote - Philippines

EMPLOYER LISTING SCREENSHOT PROOF

The screenshot shows the Indeed website interface. At the top, the URL is <https://ph.indeed.com/cmp/Old-St-Labs/salaries/Software-Development-Intern>. The main header includes the Indeed logo and navigation links: Home, Company reviews, Find salaries, Employers / Post Job, and a Chat button. Below the header, the company profile for 'Old St. Labs' is displayed, featuring a 'Follow' button and a 'Write a review' button. The 'Salaries' tab is selected, showing a section titled 'Software Development Intern monthly salaries in the Philippines at Old St. Labs'. This section includes filters for 'Job Title' (Software Development Intern, 2 salaries) and 'Location' (Philippines). The average salary is highlighted as 'Php 15,000 per month', with a note indicating it is '19% Below national average'. A small graphic of stacked coins is shown next to the salary information. At the bottom, there is a link to 'Compare all Software Development Intern salaries in the Philippines'.

PROCESS & INTEGRITY NOTE

Search Methodology, Verification Framework & AI Transparency

1. JOB IDENTIFICATION STRATEGY

I located the Information Technology Intern position on Indeed by executing targeted query parameters: *"IT intern remote Philippines work from home"*. I selected the Old St. Labs listing because it provides structured mentorship, a paid monthly allowance, a 100% remote setup, and active September 2026 recruitment.

2. OPPORTUNITY EVALUATION (CABC METHOD)

Credibility (C) Verified Old St. Labs' established corporate profile on Indeed and confirmed a valid domain-specific point of contact for applications.	Accuracy (A) Cross-referenced job duties with standard tech industry internships; tasks regarding coding and remote support match standard expectations.
Bias (B) Analyzed text for realistic claims; information is straightforward, clearly stating compensation, 2-month duration, and direct training without exaggeration.	Currency (C) Confirmed listing freshness showing an onboarding date of September 2026, ensuring the vacancy is current and actively hiring.

3. ARTIFICIAL INTELLIGENCE & INTEGRITY STATEMENT

Artificial Intelligence was utilized strictly as an auxiliary tool for grammatical refinement in the cover letter and structural layout organization for the resume. All recommendations were evaluated personally prior to adoption. The documented AnyDesk remote technical support experience reflects authentic work executed for the SmartEL Technical Team. No qualifications or work histories were artificially created or exaggerated.

4. PRIVACY & DOCUMENT DESIGN RATIONALE

To protect personal data privacy, details were restricted to city-level location, a professional email address, and a public GitHub portfolio. Sensitive identifiers (such as exact residential address, government numbers, or passwords) were deliberately omitted. Design choices prioritize high contrast, legible typography, and intuitive visual hierarchy for rapid evaluation by hiring managers.
